

SAUDI BOARD RESIDENCY TRAINING PROGRAM

RESTORATIVE DENTISTRY

Promotion Examination

Written Examination Format:

- A written examination shall consist of one paper with not less than 100 MCQs with a single best answer (one correct answer out of four options).
- The examination shall contain type K2 questions (interpretation, analysis, reasoning and decision making) and type K1 questions (recall and comprehension).
- The examination shall include basic concepts and clinical topics relevant to the specialty.
- Clinical presentation questions include history, clinical finding and patient approach. Diagnosis and investigation questions include the possible diagnosis and diagnostic methods. Management questions include treatment and clinical management, either therapeutic or nontherapeutic, and complications of management. Materials and Instruments questions include material properties, usage, and selection of instruments and equipment used. Health maintenance questions include health promotion, disease prevention, risk factors assessment, and prognosis. Basic Principles questions include the basic fundamentals of prosthodontics and operative dentistry. Maintenance and Complications questions include maintaining patient wellbeing, serviceability of restorations, and procedures, as well as the precautions to avoid complications and complication management.

Passing Score for Promotion Exam:

The trainee's performance is assessed in each of the evaluation formulas according to the following scoring system:

Score	Less than 50%	50% – 59.4%	60% - 69.4%	More than 70%
Description	Clear Fail	Borderline Fail	Borderline Pass	Clear Pass

1. To upgrade the trainee from a training level to the next level, She/he must obtain at least a **Borderline Pass** in each evaluation form.
2. The program director may recommend to the local supervision committee to request the promotion of the trainee who did not meet the previous promotion requirement according to the following:
 - A. In case that the trainee gets a **borderline Fail** result in **one** of the evaluation forms, the remaining evaluation forms must be passed with **Clear Pass** in at least **one** of them.
 - B. In case that the trainee gets a **borderline Fail** result in **two** of the evaluation forms to a maximum, provided they do not fall under the same theme (Knowledge, Attitude, Skills). The remaining evaluation forms must be passed with **Clear Pass** in at least **two** of them.
 - C. The promotion must be approved in this case by the scientific council for the specialization.

Crash Courses:

- Outline of each course including suggested reading references given by the provider.

Note:

This list is intended for use as a study aid only. SCFHS does not intend the list to imply endorsement of these specific references, nor are the exam questions necessarily taken solely from these sources.

Blueprint Outlines

No.	<u>R1</u> Section	Proportion
1	Applied Dental Biomaterials	10%
2	Cariology	16%
3	Operative Dentistry	30%
4	Esthetics	12%
5	Fixed Prosthodontics	22%
6	Occlusion	10%
Total		100%

No.	<u>R2</u> Section	Proportion
1	Applied Dental Biomaterials	5%
2	Cariology	14%
3	Operative Dentistry	30%
4	Esthetics	12%
5	Fixed Prosthodontics	22%
6	Occlusion	10%
7	Dental Implants	7%
Total		100%

Note:

- Blueprint distributions of the examination may differ up to +/-5% in each category.
- Percentages and content are subject to change at any time. See the SCFHS website for the most up-to-date information.
- Research, Ethics, Professionalism and Patient Safety are incorporated within the various domains

Example Questions

EXAMPLE OF K1 QUESTIONS

Question 1

Which of the following materials have been successfully used for the management of perforation?

- A. MTA
- B. Hydroxyapatite with GI over it
- C. A and B
- D. Calcium hydroxide

EXAMPLE OF K2 QUESTIONS

Question 1

A 27-year-old woman arrived at the clinic complaining of severe continuous pain in the lower left side since last night. Clinical examination showed IOE #36 OD amalgam, #37 PFM crown. Thermal and percussion test revealed severe respond in # 36 and a normal respond in # 37 (see report).

Radiograph:

#36 deep M caries, widening in PDL.

#37 substandard RCT with normal preapical tissue.

Which of the following is the most likely diagnosis?

- A. Reversible pulpitis, normal apical tissue#36
- B. Pulp necrosis, symptomatic apical periodontitis #36
- C. Pulp necrosis, asymptomatic apical periodontitis #36
- D. Irreversible pulpitis, symptomatic apical periodontitis #36
