

SAUDI FELLOWSHIP TRAINING PROGRAM

CLINICAL PHARMACY SOLID ORGAN TRANSPLANTATION

Final Examination

Exam Format:

A Saudi subspecialty fellowship final written examination shall consist of one paper with 80-120 Single Best Answer MCQs. 10% unscored items can be added for pretesting purposes.

Passing Score:

The passing score is 70%. However, if the percentage of candidates passing the examination before final approval is less than 70%, the passing score must be lowered by one mark at a time aiming at achieving 70% passing rate or 65% passing score whichever comes first. Under no circumstances can the passing score be reduced below 65%.

Blueprint Outline:

No.	Sections	%
1	Pretransplant ¹	15%
2	Perioperative ²	20%
3	Post-transplant ³	30%
4	Graft dysfunction	10%
5	Immunosuppression	15%
6	Ambulatory care ⁴	10%
Total		100%

Solid Organ Transplantation includes liver (45%); kidney (45%); heart, lung, pancreas and islet cell and small bowel or combination of 2 or more organs (10%)

¹Pretransplant: including indications and contraindications and candidacy of transplantation; screening of donors and recipients; transplant immunology; prophylaxis of infections.

(laboratory testing and immunizations)

² Perioperative: including perioperative complications (donor and recipients); management of patients and donors pre- and immediately after transplant in ICU; prophylaxis and management of rejection; prophylaxis of infections (viral, bacterial, mycobacterial, parasitic and fungal)

³Post-transplant including but not limited to: non infectious, infectious, graft dysfunction, management of acute and chronic rejection (cellular and humoral); immunosuppressive medications and immunizations; infectious diseases prevention and management (bacterial, viral fungal, mycobacterial, parasitic infections); post-transplant complications {short and long term complications including but not limited to cardiovascular, chronic diseases, endocrine, CNS, post-transplant lymphoproliferative disease(PTLD)}; adherence to medical regimen; recurrence of disease; post-transplant malignancy and indications for re-transplantation.

⁴Ambulatory care including but not limited to post transplant care, management of immunosuppression's, common infectious diseases, common comorbidities.

Notes:

- Blueprint distributions of the examination may differ up to +/-5% in each section.
- Percentages and content are subject to change at any time. See the SCFHS website for the most up-to-date information.
- Research, Ethics, Professionalism, and Patient Safety are incorporated within various domains.
